

Labor and Population Economics

MA ECON AM MPE LAPOP

Content and learning outcome

Content This course covers current theories and empirical methods to explain labor market developments and population dynamics in selected industrialized countries. The course focuses in particular on the interaction between these two areas. It also stresses the importance of institutions in explaining differences in labor market and population performance across countries.

Learning outcome The Students are exposed to current questions and topics in the areas of labor and population economics. They acquire the ability to conduct their own research in this field.
